4.1 Login Interfaces	19
4.2 Member Interfaces	26
4.2 Admin Interfaces	41

1.0 System Analysis

The current system, as detailed in the previous report, almost all activities are done manually. There are 2 main processes in the current system, application of new members and application for loan, involving interactions between the new users, members and the board of directors.

For both member application and loan application require the applicant to fill in and submit the respective forms. After that, their application would be approved by the board of directors of KADA. After the application is approved, the information would then be recorded into the current system.

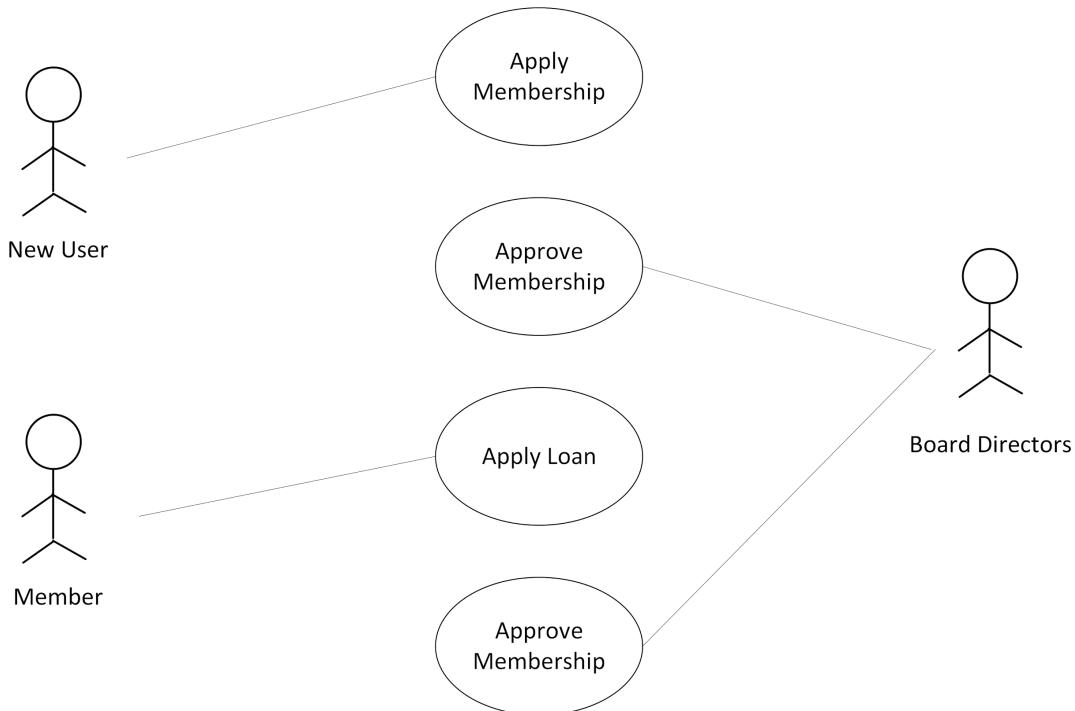

Figure 1: Use case diagram for the current system

Based on the online meeting session with the representatives from KADA, we get to know that they would like to digitalise both the membership and financing application process. As in the previous report, we have identified several problems in the current system:

- Offline registration require user presence
- Prone to unauthorised access
- Risk of data loss
- Unable to generate report
- The inability to calculate gain and loss of company

Based on the requirements, a new model is proposed and is depicted in the following section.

2.0 System Specification

2.1 Logical DFD (TO-BE) System

The following data flow diagram shows the inputs and outputs of each entity and the processes in the proposed system.

2.1.1 Context Diagram

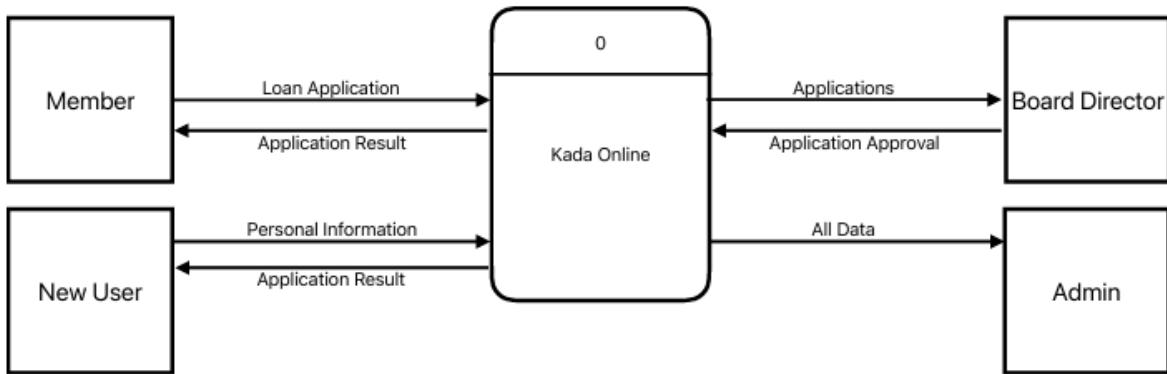

Figure 2: Context Diagram for the proposed system

2.1.2 Diagram 0

Figure 3: Diagram 0 for the proposed system

2.1.3 Child Diagram

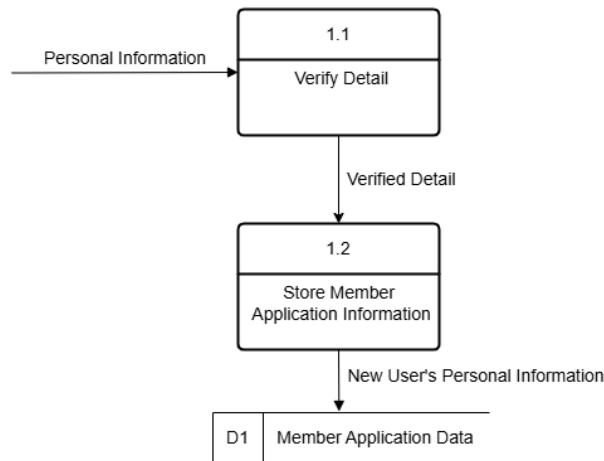

Figure 4: Child Diagram for process 1 (Apply for member) of the proposed system

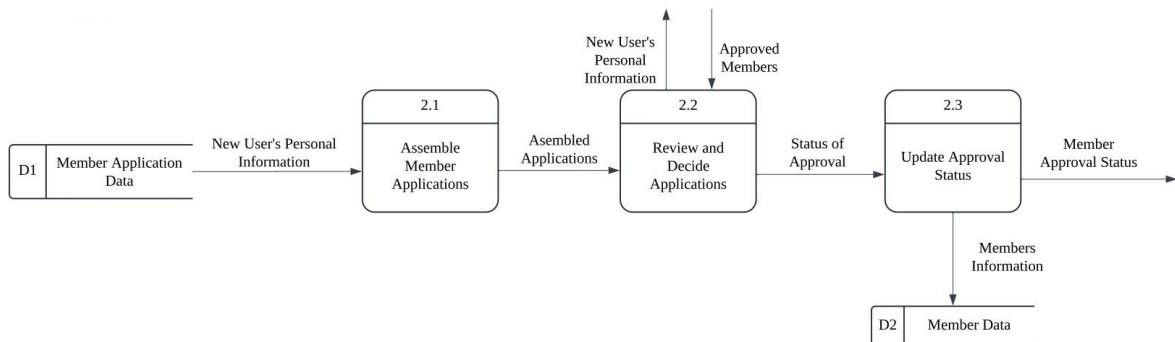

Figure 5: Child Diagram for process 2 (Approve member application) of the proposed system

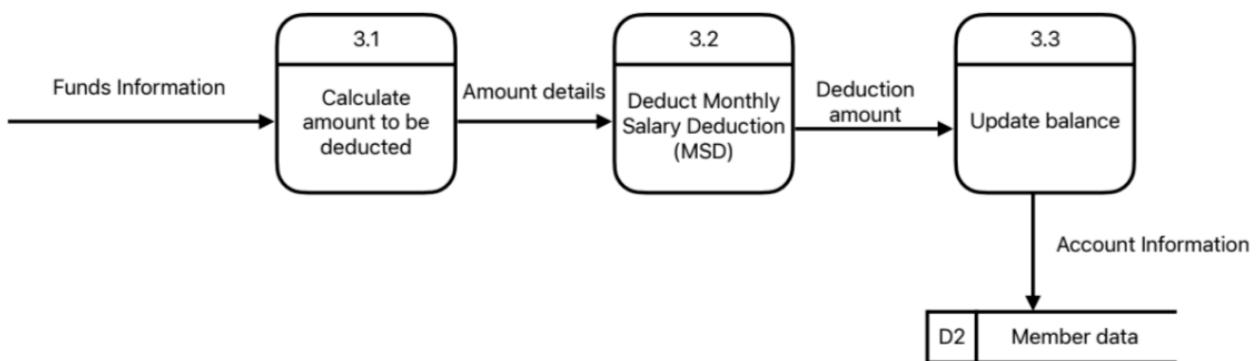

Figure 6: Child Diagram for process 3 (Deduct Salary) of the proposed system

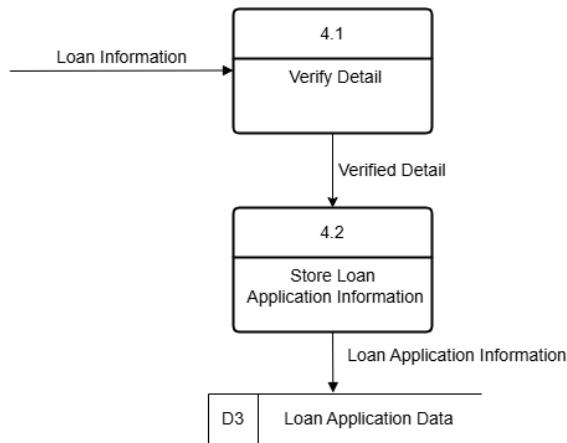

Figure 7: Child Diagram for process 4 (Apply loan) of the proposed system

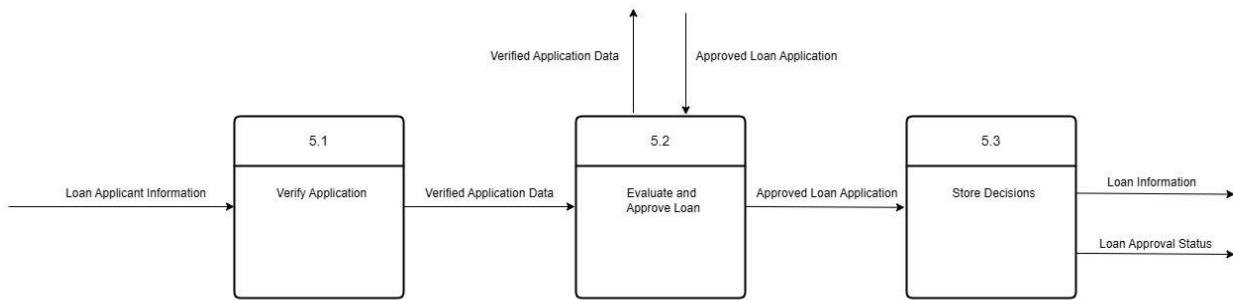

Figure 8: Child Diagram for process 5 (Approve loan application) of the proposed system

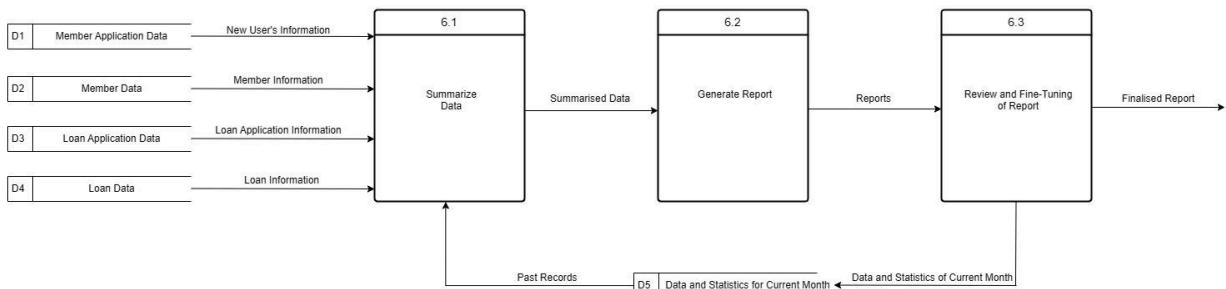

Figure 9: Child Diagram for process 6 (Reporting) of the proposed system

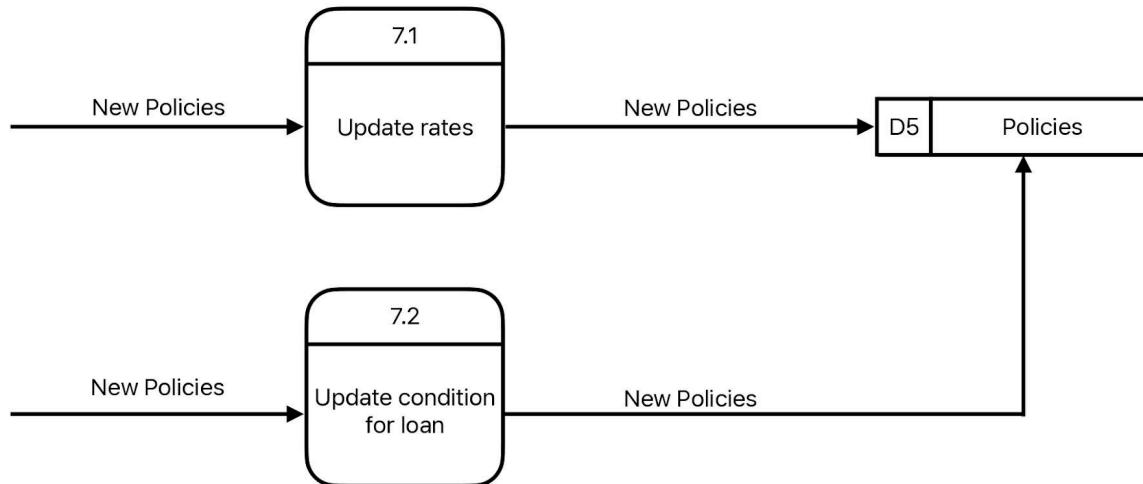

Figure 10: Child Diagram for process 7 (Update policies) of the proposed system

2.2 Identification of Process Specification

Based on the child diagrams in the previous section, it is discovered that there are 3 processes that require more detailed specification. The remaining processes are mainly basic input output that may not require a process specification.

Process 3.1 Calculate amount to be deducted

Description	Calculate the amount that need to be deducted and the amount is used in Monthly Salary Deduction (MSD) process
Input Data Flow	Funds information form member entity
Output Data Flow	Final Amount to process 3.2
Type of Process	Online
Subprogram / Function name	-
Process logic	<ol style="list-style-type: none"> 1. RECEIVE Funds Information <ol style="list-style-type: none"> 1.1 EXTRACT loan details from Funds Information 1.2 EXTRACT corresponding amounts from Funds Information 2. FOR EACH loan detail: <ol style="list-style-type: none"> 2.1 ADD corresponding amount to Final Amount to be deducted 3. RETURN Final Amount
Unresolved issues	

Process 5.1 Verify Application

Description	To ensure that the applicant passed a certain requirement before the applicant applied for the financing service.
Input Data Flow	Loan Applicant Information
Output Data Flow	Verified Application Data to 5.2
Type of Process	Online
Subprogram / Function name	-
Process logic	<ol style="list-style-type: none"> 1. Receives information of loan applicants <ol style="list-style-type: none"> 1.1. Extract Identification and Residency Proof 1.2. Extract Income and employment verification 1.3. Extract Current Debt Information 2. IF identification, residency proof and employment verification are valid <ol style="list-style-type: none"> 2.1. Calculate Debt-to-Income Ratio (DTI) 2.2. Mark Applicant as rejected and save 2.3. LOOP 3. IF Debt-to-Income Ratio < 45% <ol style="list-style-type: none"> 3.1. Mark Applicant as verified and save 3.2. LOOP 3.3. Mark Applicant as rejected and save 3.4. LOOP
Unresolved issues	

Process 6.1 Summarise Data

Description	Gather and filter the data from the database. Compute the statistics required for the report generating process
Input Data Flow	Member Application Information
Output Data Flow	Filtered data and statistics to Process 6.2
Type of Process	Online
Subprogram / Function name	-

Process logic	Extract data of the enquired month / year from Member Application Data, Member Data, Loan Application Data and Loan Data Calculate the total number of member applications Calculate the total number of approved member applications Calculate the rate of member application approval Calculate the total number of loan application Calculate the total number of approved loan application Calculate the rate of loan application approval Calculate the amount of loan approved Calculate the amount of instalment received
Unresolved issues	What other information that would need to be included in the report and needs to be calculated in this process.

3.0 System Design

In the new system, the application forms will be shifted online. If the user is not a member (referred as “New User” in the diagrams prior to this), the new user would need to apply to be a member. If the user is already a member of the cooperation, the member would be able to apply for financing via the system. The applicants can apply for new members and financing online without requiring physical presence. Besides, a user can only apply for a loan if and only if the user is logged in to the system as a member.

The new system may also apply data loss prevention procedures to reduce the risk of data loss. This would include data backup procedures and data encryption for sensitive data.

Since in the current system, the applications will be passed to the board of directors of approval, the proposed system does the same. However, the administrator would not need to store the physical application forms, instead the administrator can just print out the application only when the board meeting is about to occur. This can reduce the risk of unauthorised access of the paper based application form.

Besides, the system can easily generate monthly and annual reports based on the data stored in the database. Based on the meeting session with the representative session with KADA, the reporting mechanism is not mentioned in the current system. Thus, this additional feature aims to help KADA in evaluating the condition and financial performance of KADA.

In the new system, the process of member application and loan application can be done on the system, without the need to physically fill in a paper based form. The information will be stored in a database. After the application result is available, a notification will be sent to the user automatically via email. The deduction of monthly salary and the financial information of the members will be computed by the system. Besides, the generation of reports is also done by the system.

On the other hand, the process of approving the application will still be done manually, where a board meeting will be held to review the applications. After that, the result will be keyed into the system.

The proposed system is a web based application and would need to have a computer with internet connection to be able to use it.

3.1 Physical DFD (TO-BE) System

3.1.1 Diagram 0

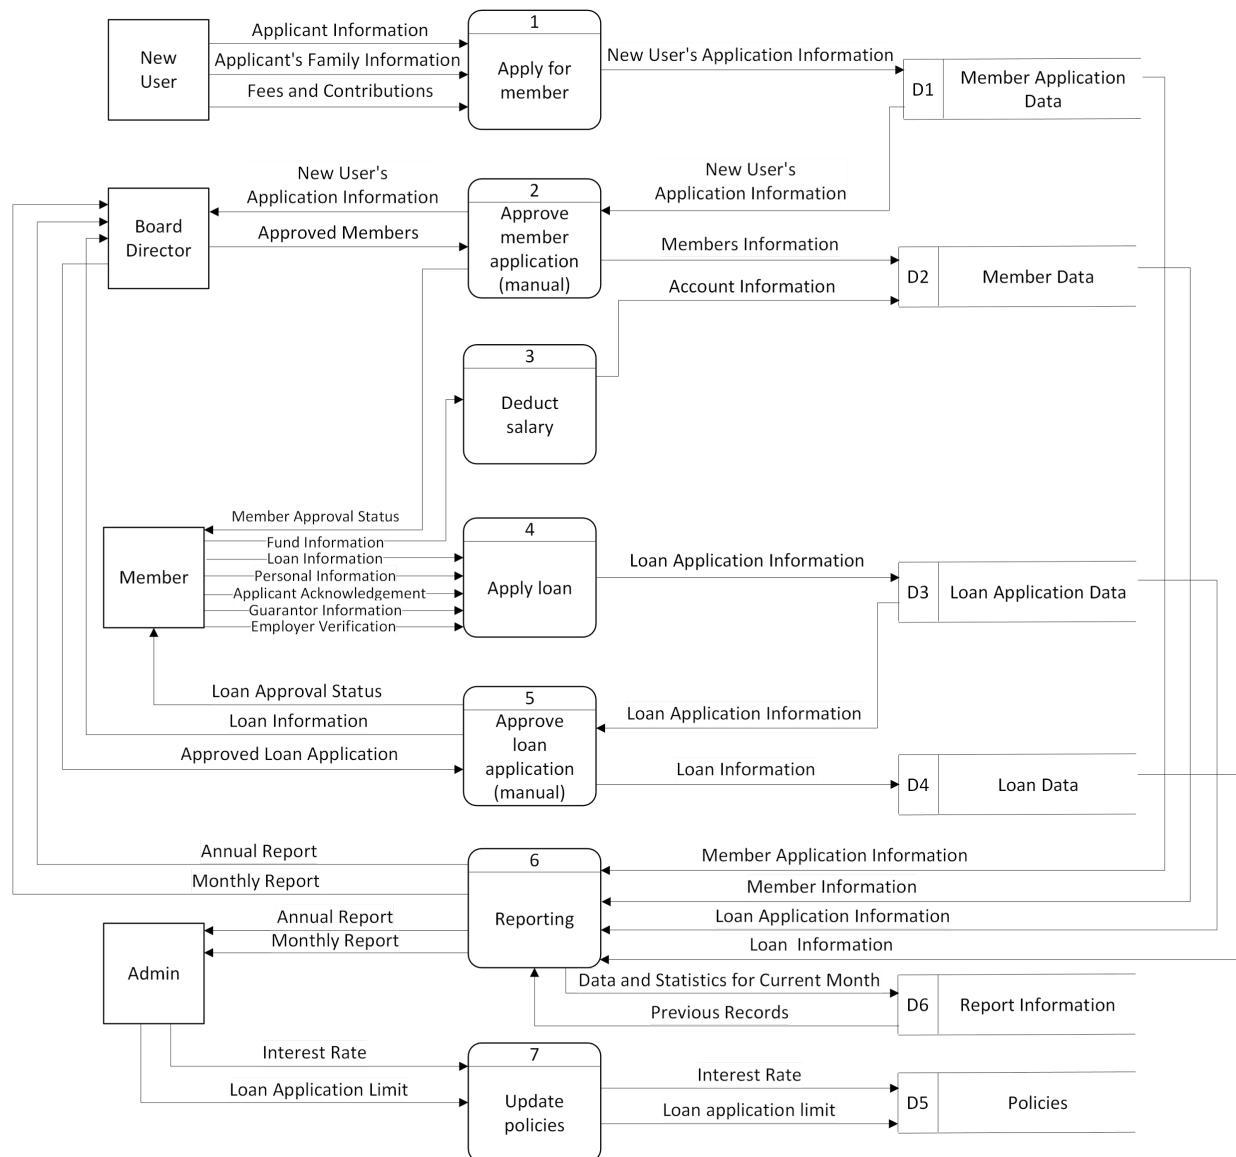

Figure 11: Diagram 0 for the proposed system

3.1.2 Child Diagram

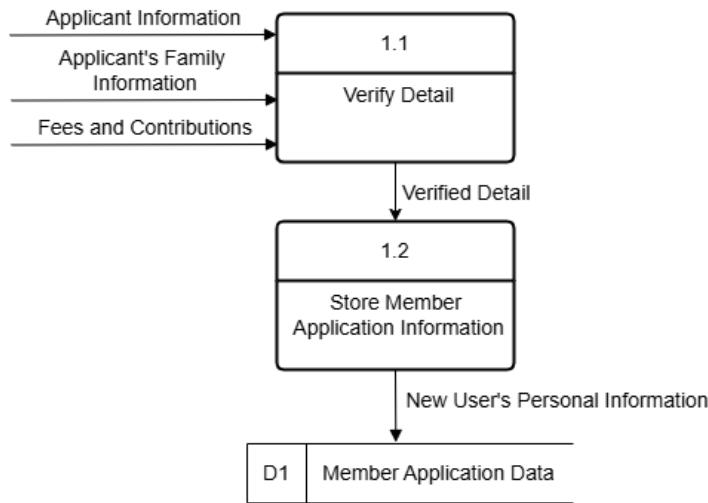

Figure 12: Child Diagram for process 1 (Apply for member) of the proposed system

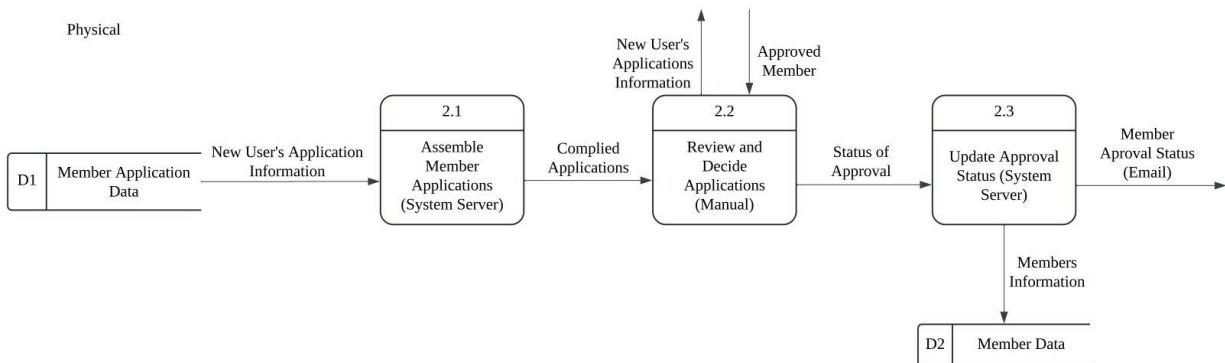

Figure 13: Child Diagram for process 2 (Approve member application) of the proposed system

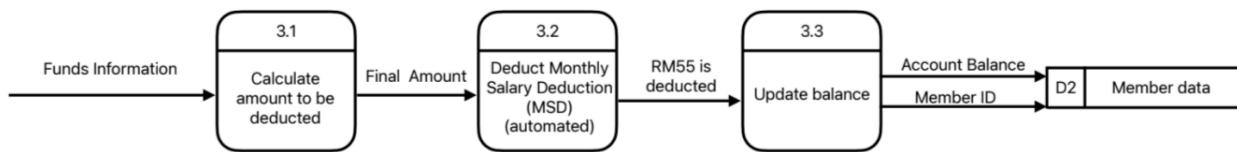

Figure 14: Child Diagram for process 3 (Deduct Salary) of the proposed system

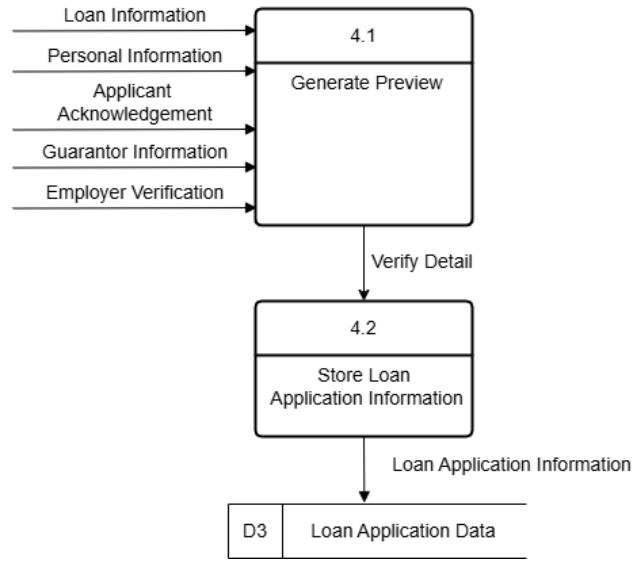

Figure 15: Child Diagram for process 4 (Apply loan) of the proposed system

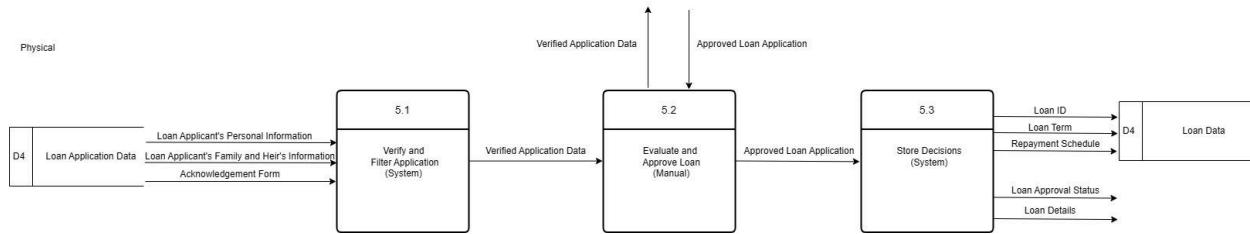

Figure 16: Child Diagram for process 5 (Approve loan application) of the proposed system

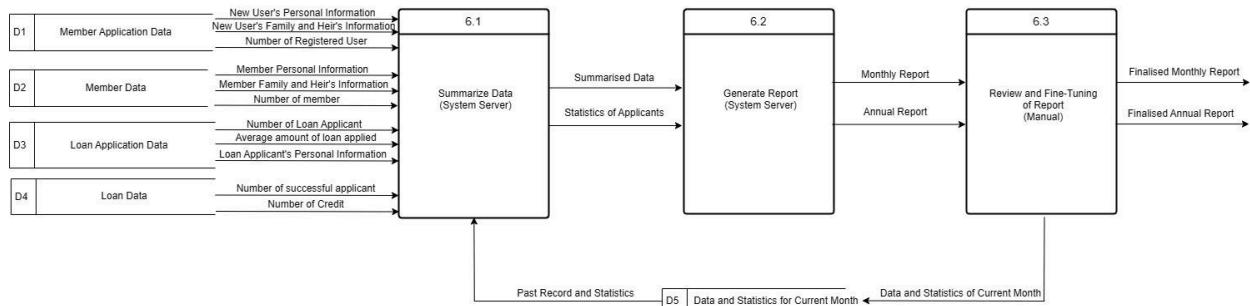

Figure 17: Child Diagram for process 6 (Reporting) of the proposed system

3.1.3 Partitioning

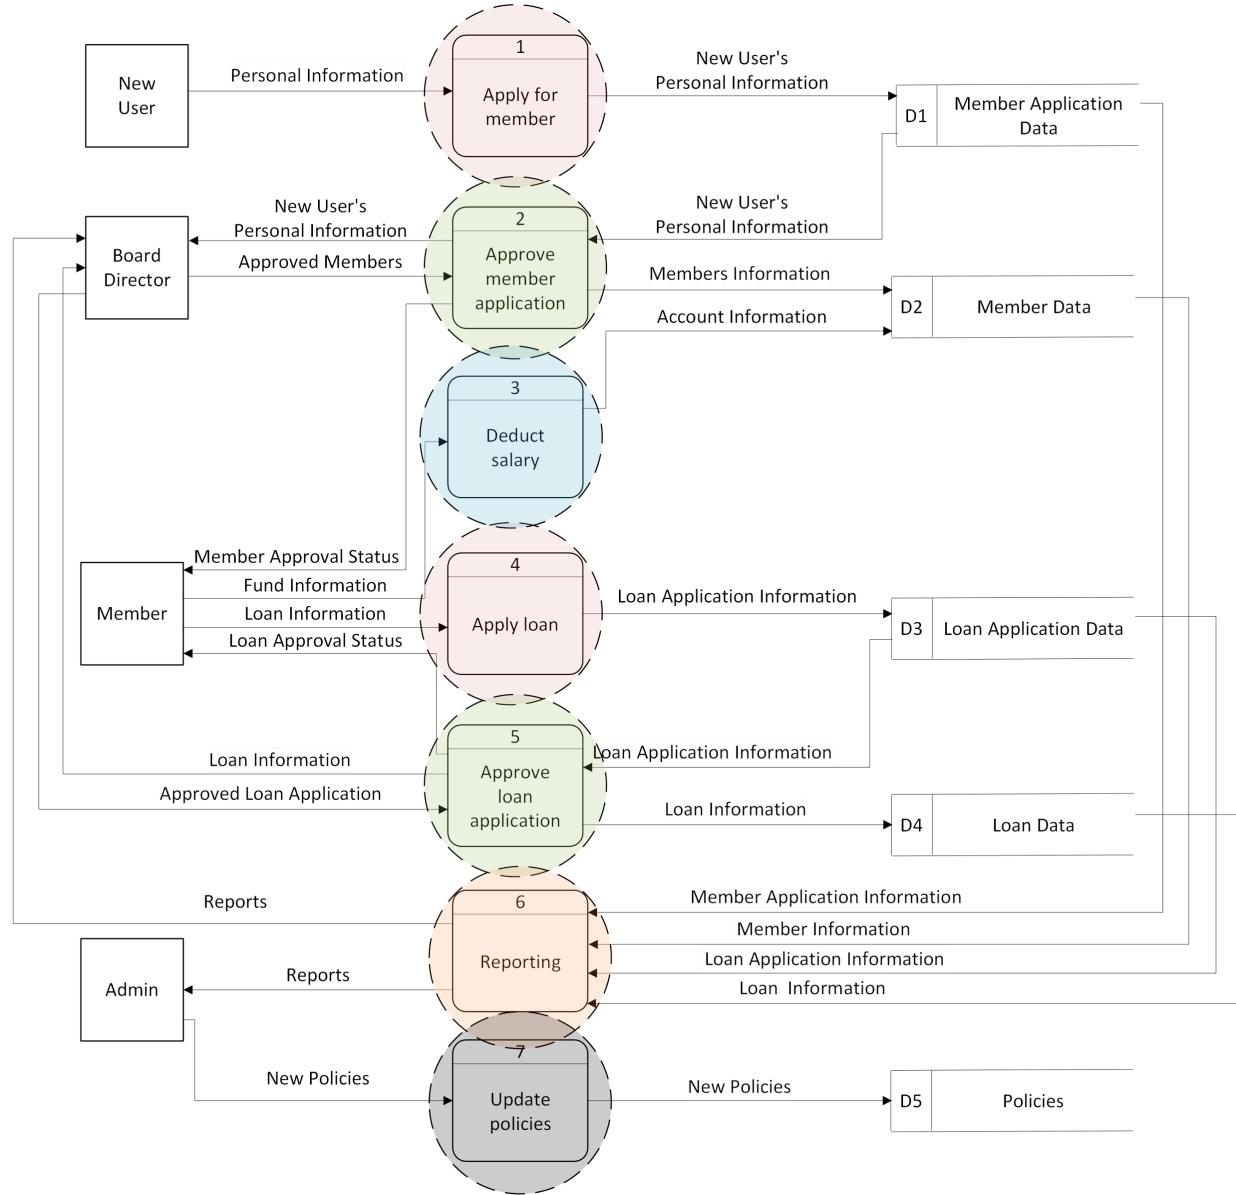

Figure 18: Partitioning of the Physical Data Flow Diagram

Due to the arrangement of the data flow diagram, we did the partitioning using the difference of colour. Process 1 (Apply for member) and process 4 (Apply Loan) are grouped together and process 2 (Approve member application) and process 5 (Approve loan application) are grouped together.

3.1.4 CRUD Matrix

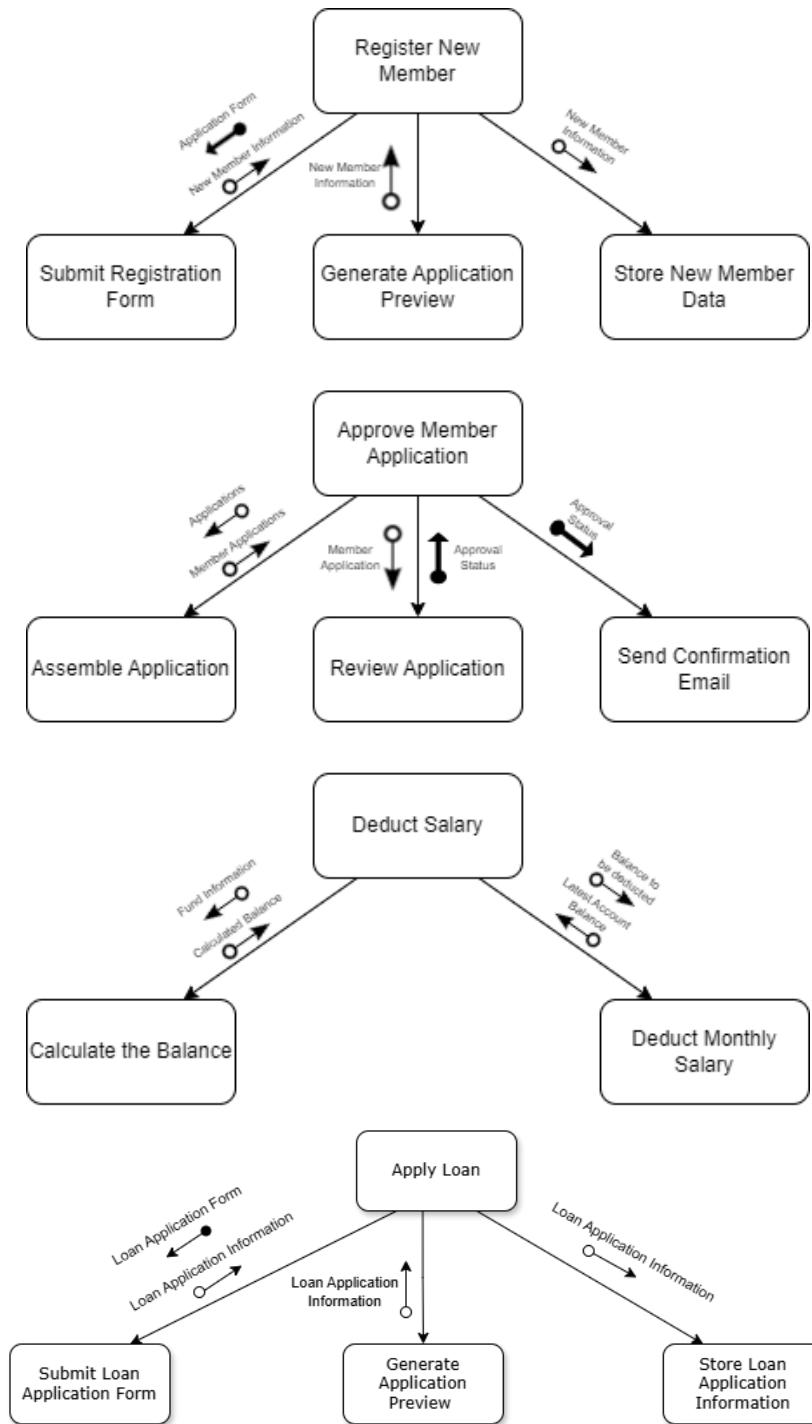

Activity	Member Application	Loan Application	Member	Loan	Policy
Apply Member	C		R		
User Log In			R		
Member Application Status Update	U		C		
Apply Loan		C	R	R	R
Loan Application Status Update		U	U	C	R
Salary Deduction			U		R
Update Policy					U
Close Member Account			D	R	
Reporting	R	R	R	R	R

3.1.5 Event Response Table

Event	Source	Trigger	Activity	Response	Destination
User Apply Member	User	User information	Check if member available. If not, store data on Member Application. If yes, send Member Login page.	Notice User to Wait for Approval page	User Admin
User Log In	User	User ID and password	Find account record and verify password. Send to Home page.	Home page	User
Admin Update Member Application Status	Admin	Application status	Find application record and update status. Store data on Member. Send email to notify member.		User
Member Apply Loan	Member	Loan application information	Find member record and determine qualification. Store data on Loan Application.	Notice Member to Wait for Approval page	Member Admin
Loan Application Status Update	Admin	Application status	Find application record and update status. Store data on Loan. Send email to notify member.		User
Salary Deduction		Monthly	Update member data. Send email to notify member.		
Admin Update Policy	Admin	New policy	Store data on Policy. Send email to notify member.		Member
Reporting		Monthly	Send report to admin	Reporting page	Admin

3.1.6 Structure Chart

The following diagram shows the structure diagrams for each process of KADA Online System.

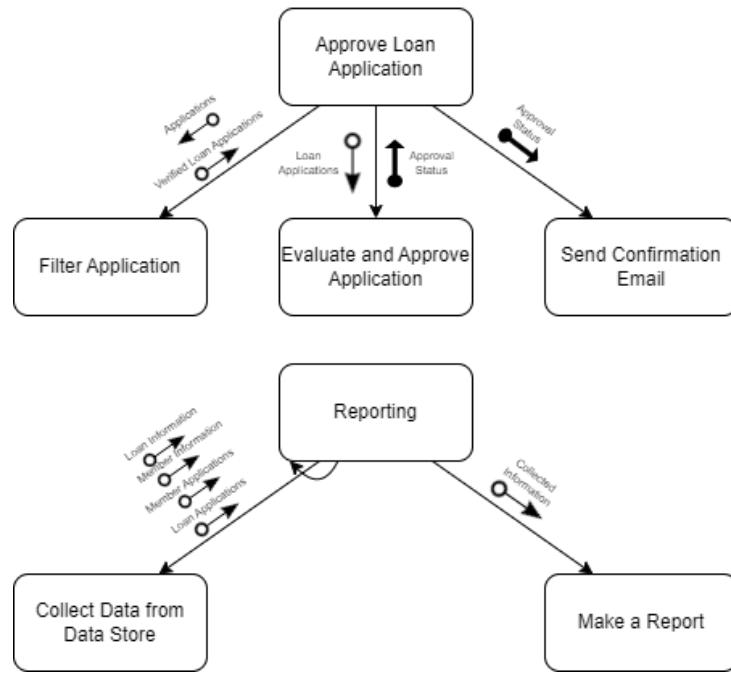

Figure 19: Structure Chart of the proposed system

3.1.7 System Architecture

The following diagram shows the 3-tier system architecture of the proposed system.

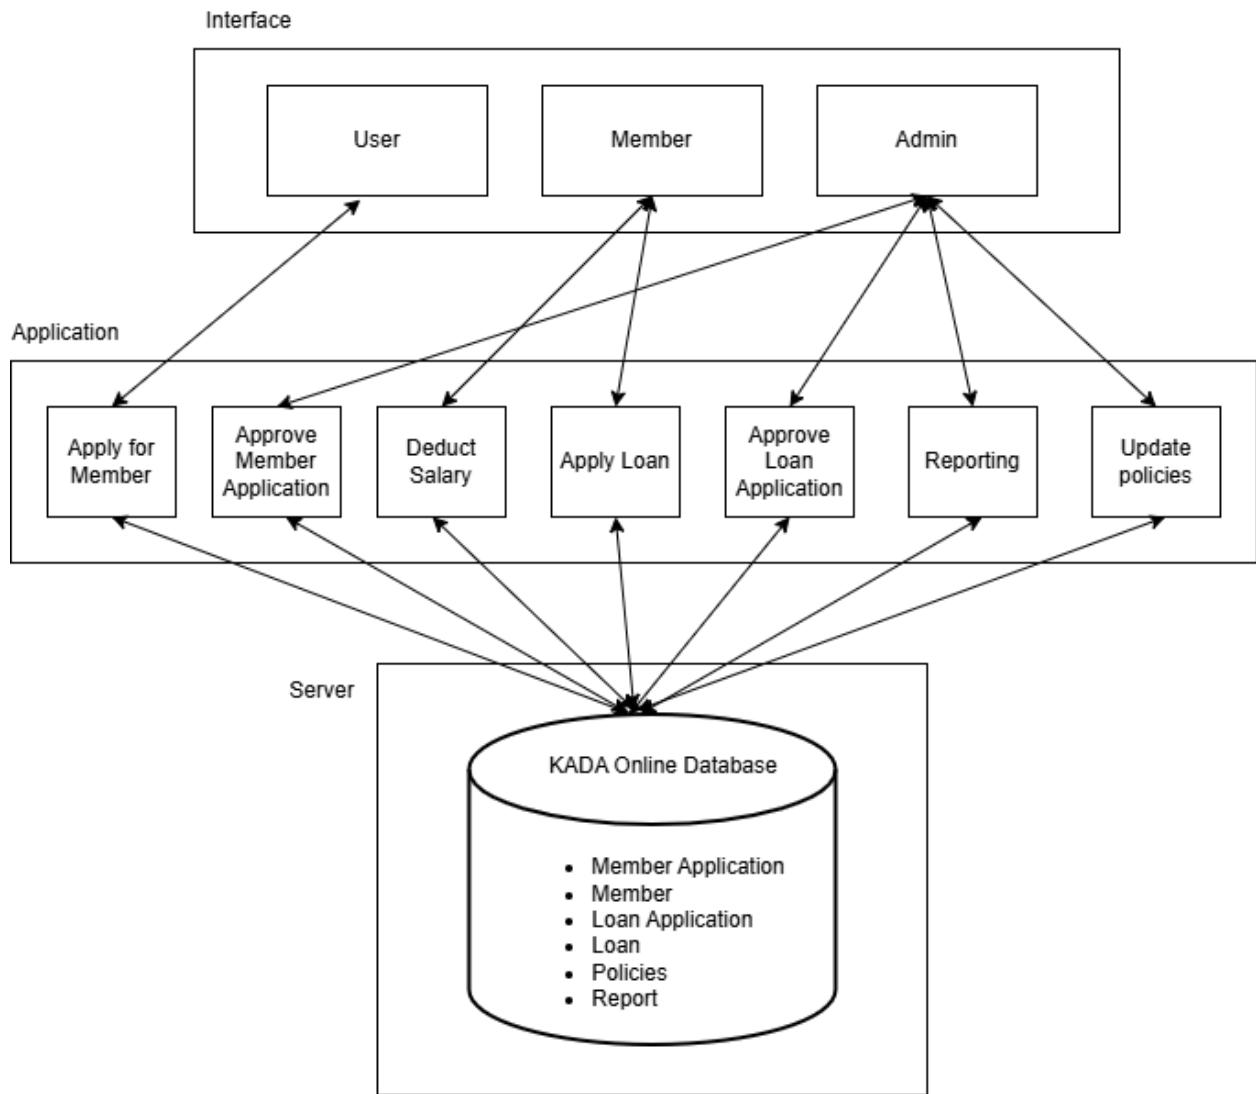

Figure 20: System Architecture of the proposed system

4.0 System Wireframe

This is the figma link for our wireframe:

Sumbangan Tabung Kebajikan: RM 5.00

Update member application base policy:

The screenshot shows the KADA application's 'Kemaskini Polisi Asas Permohonan Anggota' (Update Application Base Policy) page. At the top, there is a blue header bar with the KADA logo on the left, and 'Laman Utama' and 'Log Keluar' buttons on the right. Below the header is a navigation menu with tabs: 'Permohonan Anggota', 'Permohonan Pinjaman', 'Senarai Anggota', 'Senarai Peminjam', 'Kemaskini Polisi', 'Kemaskini Iklan', and 'Laporan'. The main content area has a title 'Kemaskini Polisi Asas Permohonan Anggota'. Below the title are several input fields for fees and minimum amounts, each with a placeholder value of 'RM 0.00': 'Fee Masuk', 'Modah Syer Minimum', 'Modal Yuran Minimum', 'Wang Deposit Anggota Minimum', 'Sumbangan Tabung Kebajikan (Al-Abrar) Minimum', 'Simpanan Tetap Minimum', and 'Lain-Lain'. At the bottom of the form are two buttons: '< Kembali' (Back) and 'Simpan' (Save).

The screenshot shows the KADA application's 'Kemaskini Polisi Asas Permohonan Anggota' page after a successful update. The interface is identical to the previous screenshot, but a large blue callout box in the center displays the message 'Maklumat anda telah berjaya disimpan' (Your information has been successfully saved). In the bottom right corner of this callout box is a small red 'X' icon. The rest of the page, including the input fields and buttons, remains visible.

Update salary deduction policy:

The screenshot shows the KADA system's interface. At the top, there is a blue header bar with the KADA logo on the left and navigation links: Laman Utama, Log Keluar, Permohonan Anggota, Permohonan Pinjaman, Senarai Anggota, Senarai Peminjam, Kemaskini Polisi, Kemaskini Iklan, and Laporan. Below the header, the main content area has a title 'Kemaskini Polisi Asas Potongan Gaji'. Underneath the title, there are two sections: 'Simpanan Tetap' with a value of 'RM 0.00' and 'Sumbangan Tabung Kebajikan' with a value of 'RM 0.00'. At the bottom of the page are two buttons: '< Kembali' and 'Simpan'.

The screenshot shows the KADA system's interface, identical to the previous one but with a prominent blue callout box in the center. The callout box contains the text 'Maklumat anda telah berjaya disimpan' (Your information has been successfully saved) and a close button 'X' in the top right corner. The rest of the page, including the header and other content, remains the same.
